DETAILED ACTION

The rejection over 6921753 has been overcome with the removal of Y=NH.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-5, 10-13 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In the definition of R, alkyl or cycloalkyl “which can optionally contain one or more O...” does not make sense. An alkyl, by its very nature, cannot contain O, since an alkyl is a hydrocarbon. There are three main possibilities for what this term actually intends:

- A. Alkyl bonded via an O, e.g. -O-propyl.
- B. Alkyl interrupted by an O e.g. -CH₂-O-C₂H₅.
- C. Alkyl substituted by O, e.g. CH₂CH₂C(O)H.

For whichever choice is selected, applicants must show that one skilled in the art could have figured out that this choice, and not another, was surely intended. The same problem occurs in the second branch of the R1 definition for R9/R10 at alkyl.

The traverse is unpersuasive. Applicants have opted for choice B. Applicants say, “The applicants do not intend an alkyl substituted by O, as the valency of the O atom would be incorrect unless it was an OH group.” That is not true. O can appear as a substituent on an alkyl or cycloalkyl group by replacing two H atoms. Applicants continue, “Once again, the claims say that the alkyl and cycloalkyl groups can contain O, S etc, not substituted by

Art Unit: 1624

O, S.” It is true that the claims do not say “substituted”, but then again, neither do they say “interrupted”. If they said one or the other, there would be no ambiguity.

Claims 1-5, 10-13 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

With the removal of X=NH, the dashed line must be replaced with a solid line, i.e. there must be a double bond. In addition, the Y=CO and CH₂ choice must be removed, as they would give a 5-bonded carbon.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to /Mark L. Berch/ whose telephone number is 571-272-0663. The examiner can normally be reached on M-F 7:15 - 3:45.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, THIS ACTION IS MADE FINAL. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
